

Use-Case Flow Specification – Create Showcase Profile

Use Case: UC-01 – Create Showcase Profile

Primary Actor: Student Team

Related Requirement: FR-001

Preconditions

1. The student team is registered and authorized to use the system.
2. The student team has the required project information, including an abstract summary, demo video link, and GitHub repository URL.
3. The showcase system is available.

Postconditions

1. A showcase profile is created and stored in the system.
2. The GitHub repository URL is validated successfully.
3. The project profile is published in the showcase catalog.

Main Success Scenario

1. The Student Team selects -“**Create Showcase Profile**”.
2. The system displays the profile creation form.
3. The Student Team enters the project abstract summary.
4. The Student Team provides the demo video link.
5. The Student Team enters the GitHub repository URL.
6. The system validates the provided GitHub repository URL.
7. The system confirms that the repository URL is valid.
8. The system creates and stores the showcase profile.
9. The system publishes the profile in the showcase catalog.
10. The system displays a confirmation message to the Student Team.

Alternate Flow – Invalid Repository URL

6a. Invalid GitHub Repository URL

1. The system detects that the provided GitHub repository URL is invalid.
2. The system displays an error message indicating that a valid GitHub repository URL is required.
3. The Student Team is prompted to correct the repository URL.
4. The Student Team enters a valid repository URL.
5. The system validates the URL and continues from step7 of the Main Success Scenario.

If the Student Team does not provide a valid URL, the profile is not published.
