

Software Engineering Lab 2

Problem Statement: Student Project Portfolio & Showcase

Student Name: Aaditya Vashisht

SRN / Section: PES1UG24CS004/A

Section 1: Agile Backlog Architecture (Epics & User Stories)

Epic	Story ID	Actor	User Story	Priority	Story Points
Epic 1: Student Project Profile Management	SPPSA-5	Student	As a student, I want to create my student project profile, so that I can present my project information in the showcase.	High	5
Epic 1: Student Project Profile Management	SPPSA-6	Student	As a student, I want to add a project abstract, so that viewers can quickly understand the purpose and scope of my project.	Medium	3
Epic 2: Project Submission & Validation	SPPSA-7	Student	As a student, I want to submit my project for the showcase, so that my completed project can be published for evaluation and viewing.	High	5

Epic 3: Project Evaluation & Judging	SPPSA-8	Judge	As a judge, I want to evaluate a submitted project using a rubric, so that projects can be assessed consistently.	High	5
Epic 3: Project Evaluation & Judging	SPPSA-9	Public User	As a public user, I want to vote for projects, so that I can support projects I find valuable or impressive.	Medium	3
Epic 4: Public Voting & Leaderboard	SPPSA-10	Public User	As a public user, I want duplicate or fake votes to be prevented, so that the leaderboard remains fair and reliable.	Low	3

Total Backlog: 24 Story Points across 4 Epics and 6 User Stories.

Section 2: Sprint Execution & Board Simulation

☐	Work	Assignee	Reporter	Priority	Status	Resolution	Created	
☐	▼ SPPSA-1 Student Project Profile Management	Unassigned	Aaditya	High	To Do	Unresolved	Aug 28, 202	
☐	☒ SPPSA-5 Create Student Project Profile	Unassigned	Aaditya	Highest	Done	Unresolved	Aug 28, 202	
☐	☒ SPPSA-6 Add Project Abstract	Unassigned	Aaditya	Medium	Done	Unresolved	Sep 01, 202	
☐	▼ SPPSA-2 Project Submission & Validation	Unassigned	Aaditya	Medium	To Do	Unresolved	Aug 28, 202	
☐	☒ SPPSA-7 Submit Project for showcase	Unassigned	Aaditya	High	Done	Unresolved	Sep 01, 202	
☐	▼ SPPSA-3 Project Evaluation & Judging	Unassigned	Aaditya	High	To Do	Unresolved	Aug 28, 202	
☐	☒ SPPSA-8 Evaluate Project Using Rubric	Unassigned	Aaditya	High	Done	Unresolved	Sep 01, 202	
☐	☒ SPPSA-9 Allow Public Project Voting	Unassigned	Aaditya	Medium	Done	Unresolved	Sep 01, 202	
☐	▼ SPPSA-4 Public Voting & Leaderboard	Unassigned	Aaditya	Medium	To Do	Unresolved	Aug 28, 202	
☐	☒ SPPSA-10 Prevent Duplicate or Fake Votes	Unassigned	Aaditya	Low	Done	Unresolved	Sep 01, 202

Section 3: Sprint Burndown & Metrics

Analysis

The burndown charts compare the ideal guideline with the remaining story points during each sprint. The actual line decreases as stories are completed and moved to Done. The charts provide a visual indication of whether the committed sprint work is being completed at an appropriate pace. Any sharp drop or period of little change can be discussed as an estimation or workflow observation.

Section 4: Reflection & Analysis

Question 1: Did your estimations reflect the actual effort?

Yes, the story point estimates reasonably reflected the relative effort required for the tasks. Higher-point stories represented more complex or uncertain work, while lower-point stories represented simpler tasks. Since the sprint was simulated, the story points represent relative effort rather than actual working hours.

Question 2: Was your backlog well-prioritized?

Yes. The backlog was prioritized according to user impact and importance. High-priority stories related to core project functionality, submission, and evaluation were placed ahead of lower-priority supporting features. This helped in selecting the most important work for the sprint.

Question 3: How did your simulated sprint align with your plan?

The simulated sprint generally aligned with the plan. Selected User Stories were moved from To Do to In Progress and then to Done as the work was completed. The sprint demonstrated how planned backlog items can be tracked and completed using the Scrum workflow.

Question 4: What insights did the burndown chart give about your team's capacity?

The burndown chart showed how the remaining story points decreased as stories were completed. The completion pattern gives an indication of the team's demonstrated capacity for the simulated sprint. Because the activity was simulated, the result should be treated as

an indication of sprint capacity rather than a precise measure of real-world velocity. A sharp decrease in remaining points can also indicate that several stories were completed close together or that estimation and task breakdown could be improved.
